SEE EASY

No problems anymore to install a complete videointercom system!

You can choose **the easiest and fastest solution**: Farfisa offers "SEE EASY" videokit, a complete colour videointercom system with all the typical functions in only one box, you will find all components for a one-way home application: hand-free, compact and surface mounted monitor with 7" LCD touch screen, compact and surface mounted external station in zinc alloy only 90 mm wide + power supply. Conceived one-way, it can be expanded by adding the suitable elements. Even system technology is extremely easy, just 2 wires where all the signals are transmitted for the requested functions: monitor auto switch-on, door lock release, call from external station, audio and video signal transmission.
