

Removable Stainless Steel Bollards with Base

An access control solution low in cost and maintenance. The unit is entirely constructed in stainless steel composed of 3 parts: the bollard, the lockable base and a cover to be used when the bollard is removed.

The bollard remains locked in place and it is removed with a special security key, the cover then replaces the bollard, leaving no opening on the ground.

Specifications:

Material: 316L

Thickness: 2mm

Removable Bollards

	Diameter	Height
BR0530SS	5" (120 mm)	30" (750 mm)
BR0630SS	6" (155 mm)	30" (750 mm)
BR0930SS	9" (220 mm)	30" (750 mm)
