**Farfisa celebrates 50 years of activity by introducing to the market a brand new outdoor panel - Alba: A suitably bright name for expressing an entrepreneurial achievement together with new industrial sights inspired by an authentic soul - Made in Italy.**

Conceived, developed and produced completely in Italy, Alba is a bright high-calibre design planned for the most technically advanced Farfisa systems, starting with Duo System. Modularity and flexibility enhanced by a body made of anodized aluminium with a brushed finish and a "weatherproof" structural system. Carefully selected materials have been used allowing an aesthetic purity that led the design concept to obtain the concealed structural elements –the speaker is hidden in the mechanism of the camera while the microphone is inserted in the lower edge so is not visible.

**A strong refined presence that preserves an advanced technological heart, compatible with all Farfisa outdoor panels and Videointercoms.**

## ACCESSIBILITY

**Alba is distinguished by features that assist people with disabilities:** The wide-angle lens allows the camera to focus on people in wheelchairs and mobility scooters; the product is equipped with an induction loop for use with compatible hearing assistance devices, the flashing call signal, speak and lock release indicators can also assist people with hearing difficulties. Braille is embossed on the call key making it recognisable to visually impaired users.
